

LAS VEGAS – Western Region Headquarters

STRUCTURAL ENGINEER PROJECT MANAGER

Role

Excellent engineering/design opportunity in Las Vegas with a national firm with a 34-year presence in Southern Nevada. We are seeking a highly motivated and experienced individual practiced in the design of public works projects including transportation, traffic, water resources, bridges, flood control and/or water/sanitary sewer utilities. We foster a flexible, team-oriented work environment that depends on individual performance and well-rounded expertise for success and that offers opportunities for long-term employment and career growth.

Candidate duties will include:

- Utilize Civil 3D, REVIT and other engineering tools to develop designs for public and private facilities.
- Correspond with client representatives and professional colleagues to foster open exchanges of information.
- Work in conjunction with designers and engineering interns to produce a complete set of construction documents.
- Coordinate and communicate with project and team leaders to promote efficient project completion.

Requirements

- Must be proficient with AutoCAD Civil 3D version 2014 or later, REVIT preferred.
- Knowledge of bridges, buildings, and walls.
- Minimum (5) years' experience in an engineering design role, management experience a plus.
- Licensure as a Professional Engineer (P.E.).
- Marketing skills a plus.
- Local market experience is preferred.

Benefits

- Competitive salary and vacation commensurate with candidate experience.
- Excellent opportunities for long-term employment and advancement.
- Excellent benefits including medical, dental, vision, short-term and long-term disability, 401K and ESOP
